

PLATFORM DATA ENGINEERING

ON-CALL ESCALATION QUICK REFERENCE

Last reviewed: 2026-07-02. Print this. It is the page you want at 03:00.

SEVERITY DEFINITIONS

- P1 Service is down, or data loss is possible. Page the duty manager immediately. Do not triage first.
- P2 Service is degraded for users, or a Tier 1 database is unprotected. Declare in #incident, then triage.
- P3 Contained, no user impact yet. Handle in hours.

TIER 1 DATABASES

WideWorldImporters, OrderPlatform. RPO 15 minutes, RTO 1 hour.
Anything affecting recoverability of these two is a P2 minimum.

CONTACTS

Database on-call	#db-oncall
Duty manager	rota in the on-call calendar
Fulfilment on-call	#fulfilment-oncall (OrderSync, WMS-Bridge)
Integration team	#integration (replication, log reader)
Infrastructure	#infra-oncall (SAN, storage extension, hypervisor)

RULES THAT DO NOT CHANGE

No destructive action on a production instance without a second person on the call. No exceptions during an incident, and no exceptions for

anything that cannot be undone.
